DETAILED ACTION

Claims 1-29 are pending in this application filed April 14, 2004.

Applicant's claims are directed towards water-in-oil emulsions comprising polyolefinic surfactants and 4,4-diarylbutadiene UV-A sunscreens.

Double Patenting

1.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2.

Claims 1-29 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-47 of copending Application No. 10/823,715. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application as well as the referenced application are claiming stable water-in-oil emulsions comprising at least one polymeric component and at least one organic 4,4-diarylbutadiene UV-A-screening agent which overlaps in scope. No patentable distinction can be found between the instant application and the referenced application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

3.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4.

Claims 1-29 are rejected under 35 U.S.C. 102(b) as being anticipated by L'Oreal WO 02/055046 A1, cited and supplied by applicant.

L'Oreal discloses oil-in-water type emulsions comprising polyolefin type polymers and copolymers. L'Oreal further discloses that the compositions that are made from these polymers are used for the skin, lips, hair care and sun protection. L'Oreal further discloses that the UV screening agents include 4,4-diarybutadiene of the same structure claimed by applicant in the instant invention. The reference discloses each and every aspect of the invention as claimed by the applicant in the instant claims.
